How to Use Lenzart ROES

Ordering a Gallery Block

- Go to the appropriate catalog:** click on Sizes, Catalog and select Gallery Blocks
- Bring your files into Lenzart ROES:** Click the "Folder" button (located near the lower right of the screen) and direct the window to the folder where your images are stored by clicking on the appropriate folder in the desktop window.
- Select your Gallery Block:** Click on the appropriate tab in the Sizes Palette - Choose from which collection you would like to order, and then the specific product. We have a wide selection from single block sizes to multiple image floating block products. Refer to our Idea Catalog on our Gallery Blocks webpage for visual examples of each product.
- Create your Gallery Block:** Drag/drop your images into the numbered boxes on the lower and/or right portion of the Gallery Block templates. As you are doing this, the larger product image will update to reflect the final product.
- Select your background in options:** If you want a background texture instead of an image on the large backboard area, choose from one of the many designs in the Options Palette, or create one in Photoshop and drag/drop the JPG into the appropriate numbered box on the template.
- Get even more creative using Photoshop:** If you want to fully customize a Gallery Block with custom edge textures, text, quotes or any other creative ideas, we will provide you with layered PSD files for each product. They contain guidelines to represent where the edge will wrap etc. Be as creative as you want in Photoshop and then flatten and save your creations as JPGs. Bring these JPGs into Lenzart ROES, choose the appropriate Gallery Block product and just drag/drop to populate the nodes.
- Complete and review your order:** Once the Gallery Block has been created, click Add to Order. Click on the "Review Order" button to see a summary of your order. Be sure to check this carefully. Complete and send the order as you would any Lenzart ROES order.
